Professional Summary

Software Developer with 1 year of experience in full-stack web development and hands-on project experience building database-driven applications. Proficient in JavaScript, Node.js, Express.js, React.js, MongoDB, RESTful APIs, JWT authentication, and role-based access control (RBAC). Skilled in backend development, API integration, database management, and implementing authentication and authorization workflows.

Technical Skills

Programming Languages: JavaScript (ES6+)

Backend Development: Node.js, Express.js, RESTful API Development, Middleware, CRUD Operations

Frontend Development: React.js, Redux, HTML5, CSS3

Database Management: MongoDB, MySQL, Database Design

Authentication & Authorization: JWT, Role-Based Access Control (RBAC), Clerk

Development Tools: Git, GitHub, Postman, MongoDB Compass, Visual Studio Code

Deployment & Hosting: Render, Vercel, Netlify, Github Pages

Fundamentals: Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), Problem Solving

Experience

Full-Stack Web Development Aug 2025 – Aug 2026

Brainnexa

• Developed and maintained RESTful APIs using Node.js and Express.js to support backend functionality and application workflows.
• Built responsive and reusable user interface components using React.js, integrating frontend features with backend APIs.
• Worked with MongoDB to manage application data and support database-driven functionality.
• Implemented API integrations, debugged application issues, and improved the reliability of frontend and backend workflows.
• Used Git and GitHub for version control, code management, feature branches, and collaborative development.

Projects

AI-Powered Invoice Generator Node.js, Express.js, MongoDB, React.js, Clerk

• Developed 8+ RESTful API endpoints for invoice creation, retrieval, updating, deletion, and tracking invoice statuses (Paid, Unpaid, and Overdue).
• Integrated Clerk authentication for secure user sign-in and session management in a multi-user invoice management application.
• Integrated React.js frontend components with backend APIs to support invoice creation, management, and status updates.

Hiring Tactics – Job Portal Node.js, Express.js, MongoDB, React.js, JWT

• Developed 5+ RESTful API endpoints for job posting, job discovery, applicant tracking, and employer dashboard workflows.
• Implemented JWT authentication and Role-Based Access Control (RBAC) to secure API endpoints.
• Designed MongoDB data models and implemented indexed search and multi-criteria filtering for job discovery and application workflows.

Education

Bachelor of Computer Applications (BCA) Aug 2022 – Aug 2025
Punjab Technical University CGPA: 8.43

Class XII Mar 2019 – Mar 2021
High School Nabiganj Bazar 63.8%

Class X Mar 2018 – Mar 2019
High School Nabiganj Bazar 66%

Languages

English – Proficient | Hindi – Native
